Karl Bartos

The return of the robot!

This year's headliner is probably best known as former percussionist-songwriter of the legendary German group a band whose influence on the evolution of electro, hip-hop, house and techno music cannot be underestimated. Since leaving the group in '91 musician, producer and more recently professor in sound Summer/ cooperated with acts like Electronic (Bernard Sumner/ Johnny Marr), OMD and Anthony Rother, and put out a few records of his project Electric Music. 2003 saw the release of "Communication" (Sony Music), the first album under his own name. Bartos live combines the vintage sound (including stunning versions of classic anthems like The Robots, The Model, Autobahn, Computerworld, Tour de France, Music Non Stop, Trans Europa Express and many more) with his own pure electronic approach. First time live in Belgium, be sure not to miss this event!
